

PRESS INFORMATION

Yuno by AURES – a Universal, flexible EPOS Concept for an even wider range of Configurations

*Runcorn - Lisses, March 2016; Yuno by AURES is the most multi-purpose adaptable EPOS system on the market and now comes with a new high-performance and reliable **Broadwell I3** platform (alternative offer to the Bay Trail J1900 processor).*

This ultra-flexible hardware is available in many options, combining and providing an extensive range of over 30 different configurations to roll out in checkout areas.

- *Choice of two processors:* depending on users' needs, Yuno is available with either a Bay Trail J1900 or a Broadwell I3-5010U processor (*new platform supporting more complex, resource-intensive management and EPOS software*).
- *Two screen formats:* Yuno is proposed either with conventional 4:3 (15.1") or 16:9 (15.6" Wide) format.
- *VESA fixings versions for wall- or pole-mounted applications:* the VESA fixings of Yuno are supplied for wall or pole mounts – articulated or not – to save space on sales counters.
- *Choice of a customer display version (displaying prices at checkouts) or dual-screen system:* the Yuno dual-screen option integrates a 2nd screen facing customers (*providing digital display solutions for checkouts, for advertising, customer loyalty schemes, etc*).
- *Simple monitor version:* Yuno is also available in a 'simple screen' (touchscreen monitor) version.
- *Choice of 2 colours:* the various Yuno configurations come in 2 colours: black or white/beige.

The POS system is fanless and stands up to dirt in the toughest settings (*fat, crumbs, dust, splashes and leftovers in kitchens, restaurants, bakeries, and other types of snack bar and takeaway*); the standard version features a 64 GB flash disk (SSD 2.5").

Energy efficient, it integrates a heat-dispersing aluminium structure to prevent any overheating and ensure compliance with environmental norms (*low carbon footprint*).

Additionally, its multi-touch projected capacitive touchscreen (PCAP technology) makes it completely shock- and scratch-resistant.

The multiple product palette of the **Yuno** family is accessible and offers many benefits (technology, ergonomics, innovation and design), which make it good value for money. It means a sensible, cost-effective and long-term investment for all point-of-sale and service IT equipment

Major features

- Fanless, multi-configuration, robust, compact but stylish EPOS hardware
- 4:3 and/or 15.6" wide (16:9 format)
- Broadwell I3 -5010 U
or Bay Trail J1900 Quad-Core processor(s)
- 2.5" 64 GB SSD
- 4 GB memory (upgradeable to 8 GB)
- Projected, capacitive, multi-touch screen (PCAP – 10 points)
- Tilting screen : from 0° to 90°
- Discreet connector ports, hidden in the stand
- Mini DP output for a 2nd screen (for digital display applications)
- Energy efficient processors (< 10 W) and low carbon footprint
- VESA option(s) for wall or pole mounted applications
- Simple monitor (touchscreen) version
- Customer display and/or 2nd screen option(s)
- Choice of 2 colours: black or white-beige

About AURES Technologies – www.ares.com

Founded in 1989 and listed on Euronext since 1999, the AURES Group manufactures EPOS systems and related peripherals. Its PC-based hardware and open-system equipment provides management and point-of-service functions for businesses including specialist food and non-food stores, retail outlets, superstores and catering and hospitality.

With corporate sales of **€76.8 million** for 2015, the AURES Group has global presence, with its head office in France, subsidiaries in the UK, Germany, Australia and the USA - and a network of distributors and resellers in 50+ countries.
