UV-CLEAN

Germicidal UV-C light guarding against the spread of infectious pathogens

Improving touchscreen infection control

UV-CLEAN is your ultimate guard against the spread of infectious pathogens, eliminating 99.9% of them on high touch surfaces. The automated chemical-free disinfecting technology is your second line of defense against the spread of infectious microorganisms in retail and hospitality POS and KIOSK touchscreen applications.

The UV-CLEAN device comes pre-assembled and is easily attached to any touchscreen monitor.

Automated cleaning cycles with low doses of UV-C light is harmful for pathogens, yet safe for you. Although hand washing policies should be your first layer of defense, UV-CLEAN will provide an additional level of disinfection to all high-touch surfaces automatically.

How Does It Work?

Germicidal UV-C light is dispensed at low levels

Microorganisms absorb the UV-C wavelength

DNA of infection-causing pathogens are broken

Pathogens are disabled, stopping them from reproducing and spreading

How do I know if it is cleaning consistently?

Simply download the cycle reports from each individual device to confirm cleaning. Every unit includes a USB cable that allows you to connect the UV-CLEAN device to a PC.

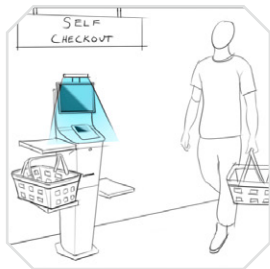

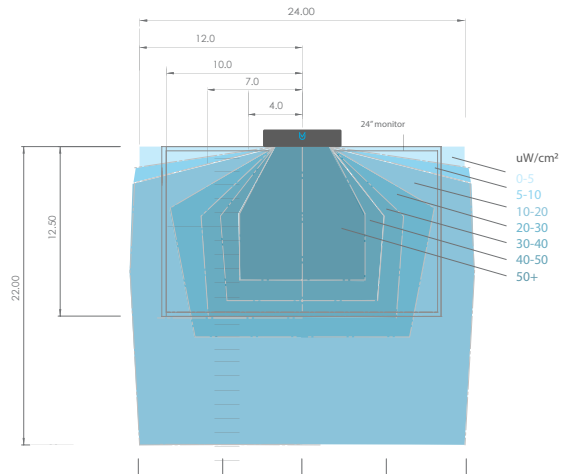

Easily access the built-in audit trail that resides locally on each device, eliminating any network security issues.

TOUCH THE DIFFERENCE

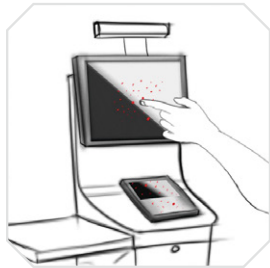

UV-CLEAN

- Automated and customisable cleaning cycle
- Motion activated for safe deployment of UV-C light
- 24" active cleaning area range
- Internal memory and built-in audit trail
- Flexible workspace configurations
- Sleek and stylish design
- 6" length x 1" diameter
- Affordable, scalable investment
- Independent low energy LED task light
- Two-year warranty

Proactive, next-generation high touch surface disinfectant

With UV-CLEAN, you can set up a strong line of defense against the spread of infectious microorganisms on high-touch surfaces or objects. Gain the upper hand in the battle against germs.

MATERIAL OVERVIEW

- 100% recyclable UV stable plastic
- UV-C bulb
- 12" micro USB to USB wire included
- 5.5 mm power port connection to USB or supplied power adapter
- North America: UVC-RF-NA
- International: UVC-RF-UP

KEY FEATURES

- Attaches to any existing wall mounted computer workstation and Proximity wall cabinets
- Optimizes day-to-day workflow with an automatic means of self-disinfection
- Low cost of ownership to implement device that won't impact efficiency

CONFIGURATIONS

UV-CLEAN is adaptable to different needs including disinfecting keyboards, POS terminals, barcode scanners and mobile devices. Choose from multiple mounting options to suit your requirements.
